

Qwik-Pay™ is an integrated Credit Card service via an internet interface for **POS, Call Center** and **eCommerce** applications and features these great benefits:

- ▶ Supports EMV (Chip in card) for card-present transactions at your POS counter *
- ▶ PCI-compliant encryption for all Credit & Debit Card transactions
- ▶ Signature capture for POS invoices and Document Center storage
- ▶ Supports all major Credit Cards
- ▶ Supports Debit Cards with Pin Pad features
- ▶ Competitive processing fees equal to or better than your existing rates
- ▶ Eliminates dedicated phone line costs with seamless Internet connection from DMS Server
- ▶ Secure storage of Credit Cards with encrypted token technology (xxxxxxxx1234)
- ▶ Allows unlimited storage of encrypted Credit Cards per customer

*Requires Dejavoo device (shown) for swipe & signature capture functionality

DX System software offers (4) integration points for this cost-saving application that includes:

- Local POS activities (card present with Dejavoo device shown above)
- Access from Call Center telesales (card not present)
- Access from Cash Application activities for payment on account (card not present)
- Option from Qwik-Order B2B eCommerce for payment of invoice (card not present)

DMS Systems Partners with Vantiv Integrated Payment Systems® for PCI-compliant Credit Cards

Vantiv™ Technical Support

Vantiv™ - our 24/7 customer and technical support service-is free and live. Our experts are always available to take calls and answer emails, regardless of the day and hour. We match our schedule to businesses that are open late at night, on weekends, or holidays to support seamless operations. Merchants can expect an average wait time of 20 seconds before their clients have a live representative on the phone.

VantivView™

Our customized portal, VantivView, takes transaction reporting a step further. With VantivView, we offer real-time transaction data plus a host of enhanced reporting features to help manage finances and streamline the bookkeeping process. VantivView's versatile platform provides real-time transaction information, transaction history, cross-store reporting, daily batch and deposit details, and monthly statements. We offer a wide array of reporting options accessible from a special tab located on your custom DMS' Corporate Portal.

VantivStand-In™

If a processing outage occurs, we turn on our unique "stand-in" authorization service. we developed this essential service so our merchants keep processing if there's an outage with the authorization network. We "stand-in" so business continues as usual. While standing-in, we approve all transactions up to the floor limit, and guarantee no financial loss to our merchants.

Vantiv's™ Complete Advantage

To get the lowest rates from most companies you need to sacrifice service. With Vantiv's unique business model, we are able to match competitor's rates while still keeping our industry leading customer service and support in place. We also do not lock Merchants into long-term contracts. Vantiv earns your business every month because of our month-to-month contracts. It's free for merchants to sign up for our processing services. Merchant will not have to fill out a pile of paper work either. Most applications with Vantiv can be completed in less than 10 minutes.

Partnership with DMS Systems Corp.

When a DMS customer has an issue processing credit cards, they want a solution-not finger pointing. Because we have a direct integration with DMS Systems, Vantiv's support teams know how we work with DMS' software to resolve their issues without blaming each other. As security standards continue to get stricter and more ridged, Vantiv and DMS will be proactive to ensure that their integration always meets the latest PCI standards to protect the DMS customer's business.
