

“WIRELESS WAREHOUSE BARCODING”

Pick – Ship – Receive – Put Away - Count

Qwik-Ship – provides a *paperless* method to create electronic pick tickets to pick and ship orders faster and more accurately – **resulting in reduced labor costs and increased profits.**

Warehouse personnel equipped with wireless hand-held RF barcode scanners display orders and scan items to maximize picking and pricing productivity and accuracy.

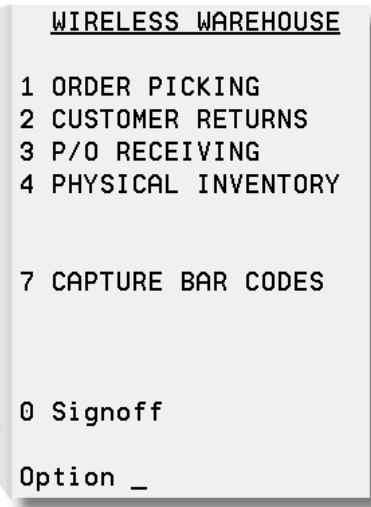

Qwik-Receive – provides a *paperless* method to process, Receive and Put-Away products from incoming Vendor Shipments and RMA Customer Returns.

Warehouse personnel equipped with wireless hand-held RF barcode scanners receive incoming Purchase Orders and process customer returns on a “real-time” basis, thus eliminating accuracy and timing issues in updating inventories available for sale to customers.

Qwik-Count – provides a *paperless* method to conduct quick Physical Inventory and Cycle Counts of warehouse inventory.

Warehouse personnel equipped with wireless hand-held RF barcode scanners can quickly and accurately conduct physical inventory counts to improve inventory accuracy, financial accountability and inventory management analysis of a Distributor’s inventory investment.

Qwik-Label – provides an easy method to create custom printed labels for products, shelf labels and shipping packages with specialized Zebra thermal printers and Ashford Barcode/400 label software.

Benefits:

- **Fast, Accurate & Easy-to-Use!**
- **Requires only ONE person for Picking, Receiving and Counting!**
- **A Major Labor-Saving Business tool!**
- **Lowers Warehouse Costs and Increases Profits!**
